# Cloud Automation, Workflows & Scheduling on AWS

## Key benefits

- The right AWS virtual machine at the right time
- A single interface to monitor all your AWS infrastructure
- All your cloud services on a single portal
- Control your AWS costs

## SaaS mode

- SaaS: Managed Services
- Easy access to Workflows & Scheduling and Cloud Automation portal in SaaS mode
- Build your workflows and submit jobs
- Different levels of support

## PaaS mode

- Install an Amazon image (AMI) directly in your Amazon infrastructure
- Keep control of your infrastructure management and administration
- Pre-installed Cloud Automation and Workflows & Scheduling
- Easily access the Workflows designer Studio, the Scheduler and the Resource Manager
- Subscribe to a preferred support plan
