

OW2 demonstrates CompatibleOne integration with OpenStack

OW2 to give a live demonstration showcasing the integration of CompatibleOne with OpenStack

Santa Clara, CA, April 26, 2011– The OW2 Consortium, the open source community for infrastructure software, participates in the OpenStack Conference, Santa Clara, CA, April 26-29. OW2 will introduce CompatibleOne, a collaborative supported by the OW2 Open Source Cloudware initiative. The highlight of the presentation will be a live demonstration showing the integration of OpenStack with CompatibleOne.

Carried out by a consortium of 15 partners, CompatibleOne addresses the three layers of cloud computing with a comprehensive open source solution to allow any organization to easily build its own cloud architecture, whether private, public or hybrid. CompatibleOne will deliver a set of pre-integrated open source components and tools for IaaS, PaaS and SaaS.

One of the main objectives of CompatibleOne is to facilitate interoperability between cloud offerings from different vendors. To achieve this, CompatibleOne provides interfaces and functionalities compatible with the most popular IaaS environment.

The demonstration by OW2 will show the integration of ProActive, the CompatibleOne scalability engine for cloud computing developed by ActiveEon. The OW2 presentation will be delivered by Cedric Thomas, OW2 CEO, and Denis Caromel, INRIA/ActiveEon.

CompatibleOne is supported by the OW2 Open Source Cloudware initiative a unique community effort to build a common vision of what should be an open cloud based on open source and open standards. It also aims at developing key software technologies following an R&D agenda collaboratively defined.

“We are excited to be already showing tangible results. CompatibleOne is a key effort within the OW2 community” said Jean-Pierre Laisné, OW2 President and co-elad of the OW2 Open Source Cloudware initiative, “We are looking forward to extend our support of OpenStack.”

About OW2

Founded in January 2007, OW2 is an independent industry community dedicated to developing open source code infrastructure (middleware and generic applications) and to fostering a vibrant community and business ecosystem. The OW2 Consortium hosts some one hundred technology projects, including ASM, Bonita, eXo Platform, JOnAS, Orbeon Forms, PetALS, SpagoBI, Talend and XWiki. Visit www.ow2.org
