# ProActive Parallel Suite® Newsletter

## ProActive at Solution Linux conference, March 16-18, 2010, Paris, France

Attend ProActive's talks in the Virtualisation & Cluster and SOA and Open Source Software tracks or during the OW2 session.

Join us on the OW2 booth! Read more...

## Products

**ProActive Parallel Suite 4.2 Stable release available!**

On December 24th 2009 we had the great pleasure to release this new stable version of ProActive after a lot of tests and improvements increasing the stability of the Technology Preview version issued for SC'09 event. ProActive Parallel Suite structure evolved in this new version to better fit your needs and further ease parallel and distributed computing: functionalities related to resources management are now packaged in one single product, **ProActive Resourcing**.

As always, all products within the suite are fully compatible and provide a very comprehensive solution:

### ProActive Programming 4.2
Further improves file processing and integration of parallelism in your application with run time annotation and more...

### ProActive Scheduling 2.0
Dramatically eases data management and storage, provides more insight on workload distribution and more...

### ProActive Resourcing 2.0
Widens the type of resources you can aggregate to further increase the available computing power: virtual machines and cloud nodes, learn more...

## Interoperability

### Standardization
ProActive team continuously focus on interoperability concerns. One way to achieve a sustainable interoperability is standardization. The implementation of the GCM ETSI Grid standard in ProActive was recently demonstrated. Read more!

### Training

**Parallel Processing for the Enterprise**
March 25, 2010
April 29, 2010

**Hands-On ProActive Parallel Suite: Bridging Distributed and Multi-Core Computing**
March 26, 2010
April 30, 2010

## Partnerships

ActiveEon continues to extend his partnership network in order to better integrate our product in packaged solutions.

### HP
HP and ActiveEon have released a new brochure presenting the partnership between HP and us. Read it!

### Carri
CARRI SYSTEMS is a company recognized for its technological expertise in high performance computer systems. ProActive Parallel Suite® federates existing machines (both Linux and Windows) with CARRI solutions (PC, GPU PC and Rack 4U, HPC clusters) into a uniform powerful infrastructure for both CPU and GPU computing. Read the announcement.

### NVIDIA
ActiveEon announced strategic relationship with NVIDIA for multi-GPUs support with ProActive Parallel Suite. Read the announcement.

## ProActive Community

### ProActive gains new users in BioTech
ProActive gains new users in biotech like IPMC laboratory in Next Generation Sequencing (NGS) for pharmacology, IGS laboratory from CNRS and INRA institute in genomics, biology and phylogenetic analysis. They use ProActive Scheduling and Resourcing to distribute Sequencing analysis pipeline or BLAST and MisterBayes applications.
