JOB OFFER

"Bi-National Chinese and French Java Developer"
Ph.D. Appreciated.

Company

ActiveEon is an INRIA start-up, a software publisher of Open Source solutions for HPC Cloud and parallel computing. ActiveEon's innovative solutions accelerate computer applications & Workflows, and manage Grids and Cloud infrastructures. The start-up chalked up several strong successes, with international customers in France, Belgium, UK, USA and China. The company also managed to set up strategic partnerships with major IT actors (DELL, HP, Microsoft). ActiveEon is located in the heart of the French "Telecom Valley": Sophia Antipolis, 30 minutes from the international airport of Nice.

Following our recent fundraising, we are opening several positions to ensure the growth of our business.

Mission

- You will be working as a technical expert in our R&D team
- You will participate in the design and development of our products
- You will work with core Java technologies
- You could do short missions to our customers for integration and support

This position requires strong technical expertise in development and software architecture. An open mind to the study of new technologies will be particularly appreciated. You will work on highly technical solutions quickly evolving in a distributed environment with high performance constraints. You will be integrated with the R&D tean and will conduct spot integration tasks for our customers. You will work on the improvement of existing solutions as well as the development of new ones.

Requirements

- You love development and innovation
- You are an experienced Java Developer
- Technical Skills: Java core / Security / RESTful / XML / JavaScript (Web UI)
- Software engineering has no secrets for you (JUnit / Git / Gerrit / Gradle / Jenkins)
- You have a good understanding of the problems of concurrent programming
- You enjoy working in a team
- You are curious and like to test new technologies
- You are involved in open source projects
- You are fluent in written and spoken English

Position is open immediately.
