Big Data: Fast Machine Learning with Docker and ProActive

See how Big Data processing can be easily achieved using ActiveEon Open Source software, in the context of integrated fast deployment in Docker container. We present in this Blog a typical Machine Learning application that is using the Statistical R Language: it predicts the monthly returns of the Standard & Poor's 500, S&P500, stock market index, using SVM classification in a financial context. Check out how *easy*, *fast*, and *portable* it is: [Read the Blog](#) . [Watch the video](#)

When and Where to meet us next

We're really looking forward to Big Data (March 10-11) and Cloud Expo Europe (March 11-12 , ExCeL London). We hope to see as many of you there as possible. If you haven't yet registered for the event, apply for a free ticket today! See information below.

If you have any question, please contact me: Elisabeth Thery, *User Support* , [mail](#) , [LinkedIn](#) .

- Paris Big Data

Big Data Congress, March 10-11 , CNIT Paris.
